

## TWIN TIE PLATES

## **Hook Twin Tie Plates**

Hook Twin Tie Plates are produced according to AREMA plan 241 and are typically available in three hook styles: Low – Type L, Low Reverse – Type LR, and High – Type H. The Type H version lacks a slotted hole and features a taller hook designed to fit over the base of a manganese frog. If the hook on a Hook Twin Tie Plate interferes with a joint bar, it can be removed or bent into a vertical position. These plates are consistently manufactured following AREMA plan 241 specifications.

Mark	L	Н	Wt. (lbs.)
L23	23"	9/16"	18.8
L27	27"	9/16"	22.2
L31	31"	9/16"	25.6
H23	23"	15/16"	19.1
H27	27"	15/16"	22.5
H31	31"	15/16"	25.9
LR23	23"	9/16"	18.8
LR27	27"	9/16"	22.2
LR31	31"	9/16"	25.6
